Enterprise CRM product (real estate)

- Built filters, saved reports, relative-date ranges, scheduling and automated email/WhatsApp delivery with Laravel Scheduler, queues and cron.
- Developed Excel, CSV and PDF exports for large datasets using chunked queries and streamed downloads; optimized heavy MySQL reports with composite indexes, eager loading and EXPLAIN-verified query changes.
- Built the Call Block permission flow: administrators configure access in Profile Settings and Module Privileges, while Leads shows or hides phone call actions for each user permission.
- Developed AI-assisted Playwright MCP tests in TypeScript in isolated sandbox environments, covering login, privilege setup and permission-driven Leads UI behaviour; reused the workflow for other CRM features.
- Built CRM Map functionality (property pins, clustering, nearby search and sales territories), Unit Management inventory, and role-based report sharing.
- Contributing to the next-generation CRM: React 19 + TypeScript + Vite SPA over a Laravel 12 + PostgreSQL REST API for dashboard, reports, leads, customers and follow-ups.
