

SUMMARY

Full Stack Developer with 2+ years of experience shipping features in a production, multi-tenant CRM product (real estate domain). Core developer of an Advanced Reporting module — dynamic report builder, chart engine, scheduled email/WhatsApp delivery, and Excel/PDF/CSV export — built on Laravel and MySQL and used daily by business teams. Currently building a next-generation CRM with React 19, TypeScript, Laravel, and PostgreSQL. Strong in SQL optimization, REST API design, and turning loose requirements into reliable, data-driven features.

SKILLS

Backend	PHP 8.x, Laravel 10–12, REST APIs, JWT, Livewire, Eloquent, queues & cron scheduling
Frontend	React 19, TypeScript, Vite, Tailwind CSS, TanStack Query, React Hook Form, Zod, Chart.js
Databases	MySQL, PostgreSQL — schema & index design, query optimization, large datasets
Tools	Git, GitHub (GitFlow), Postman, Docker (basics), ESLint, Prettier, Agile/Scrum

EXPERIENCE

Software Developer (Full Stack) — RSoft Technologies Pvt Ltd · Enterprise CRM product (real estate) Jun 2024 – Present

- Core developer of the **Advanced Reports module**: dynamic builder for detail, summary and matrix reports — multi-level group-by, aggregates (SUM/AVG/COUNT/MIN/MAX), and 10+ chart types.
- Built the **dynamic filter engine**: saved filters, relative-date filters ("last 7 days", "this quarter"), condition groups, and picklist-change tracking — removing the need for developer-written custom reports.
- Shipped **report scheduling** (daily/weekly/monthly) with automated email and WhatsApp delivery via Laravel scheduler, queues, and cron.
- Developed **Excel/CSV/PDF export** over large datasets using chunked queries and streamed downloads for flat memory usage.
- Optimized MySQL** with composite indexes, eager loading, and query restructuring — significantly faster heavy reports on high-volume tables (EXPLAIN-verified before/after).
- Added **role-based report sharing** (view/edit/schedule permissions per user and role) on top of product RBAC.
- Built the **CRM Map module** (Google Maps): property pins, marker clustering, nearby search, sales territories, distance calculations, live filters.
- Developed **Unit Management**: real estate inventory, availability, booking status, pricing, floor plans, sales tracking.
- Contributing to the **next-gen CRM rebuild** — React 19 + TypeScript + Vite SPA over a Laravel 12 + PostgreSQL REST API: dashboard, report builder, lead/customer/follow-up management, notifications.

PROJECTS

Advanced Report Builder github.com/balajis-dev5/advanced-report-builder

Open-source dynamic reporting engine: Laravel 12 API compiles a JSON report definition into safe, whitelist-validated SQL; React 19 drag & drop builder with live preview, charts, CSV/Excel/PDF export, per-user sharing, and scheduled deliveries.

Laravel 12 React 19 TypeScript PostgreSQL JWT

Modern CRM github.com/balajis-dev5/modern-crm

Full-stack CRM — leads, customers, follow-ups, analytics, notifications — with JWT auth and a typed API layer.

React 19 TanStack Query Laravel 12 PostgreSQL JWT

Portfolio <https://balajis-dev.vercel.app>

React 19 + Vite + Tailwind CSS v4 + Framer Motion — dark/light mode, SEO, accessibility-first.
